diamond willow

When scaling companies outpace their bank financing, we secure alternative lending to fund their growth.

Diamond Willow helps Canadian companies raise $10-50 million of debt from traditional and alternative lenders.

Is access to capital holding you back?

Scaling businesses need capital partners who account for more than historical performance- partners who share their vision for growth and are willing to fund their potential.

That's where we step in.

We translate your expansion strategy into defensible financial forecasts within a manageable capital structure that alternative lenders will finance, providing you with the capital you need today and a long-term strategy to bank refinancing tomorrow.

We Do Things Differently.

01 We back your potential.

We listen, learn, and understand your business and opportunity, then build a compelling narrative backed by disciplined financials, defensible projections, and a customized capital structure designed to help, not hinder, your growth.

02 Multiple lender offers.

We conduct targeted outreach to mandate-aligned lenders across the private credit market, collecting multiple offers to compare, giving you leverage, choice, and certainty that you've explored all available options.

03 Approved financing and capital.

We help you analyze offers and select the right lender, coordinate diligence, negotiate terms, and secure the capital you need faster than navigating the private credit markets alone.

Don't let short-term capital needs hinder your long-term potential.

Schedule a meeting for a no-obligation discussion to explore what non-bank options are available to you, what to expect for rates, terms, and timelines with an experienced advisor who will give you a clear line of sight to guide your next step.
